### Learning outcomes

#### *Knowledge*

Provide knowledge and skills related to the representation and conscious treatment of information and related to a conscious use of modern technologies for digital communication on the network

#### *Assessment criteria of knowledge*

Passing one of the 2 CFU modules offered by the University of Pisa as part of the SAI @ UNIPI project: IBD (introduction to the Database) or ICD (Introduction to Digital Communication) described on the page: <https://sai.elearning.unipi.it/>; or modules provided by the Department (GIS applications in agriculture). The ECDL FULL certification is recognized as an alternative.
