FINANCIAL REPORTING AND ANALYSIS	SECS-P/07	LEZIONI	63	MARCO ALLEGRINI SILVIA FERRAMOSCA

### Obiettivi di apprendimento

#### *Conoscenze*

This is a course on fundamental analysis. The course combines accounting principles and investment principles to answer the question: How do I account for value so that I can challenge stock prices with some confidence? The primary emphasis is on equity (share) valuation, with a focus on developing and applying methods for valuing firms using financial statement analysis. Topics include models of shareholder value, a comparison of accrual accounting and discounted cash flow approaches to valuation, the analysis of profitability, growth and value generation in a firm, diagnosing accounting quality, and the determination of price/earnings (P/E) and market-to-book (P/B) ratios.

#### *Modalità di verifica delle conoscenze*

During the course, the student is engaged at understanding and developing a thorough, credible equity research report or investment analysis that meets the standards of professionalism.

#### *Capacità*

By the end of the course students should have answers to the following questions:

- How are fundamental values (or “intrinsic values”) estimated?
- What business activities determine value? How is “value created for shareholders” identified?
- What is the relevance of cash-flows? Of dividends? Of earnings? Of book values?
- How does ratio analysis help in valuation? How does profitability tie into valuation?
- How does one analyze the quality of financial reports?
- What determines a firm’s P/E ratio? How does one calculate what the P/E should be? What determines a firm’s market-to-book (P/B) ratio? How does one calculate what the P/B should be?
- How does one evaluate a financial research report?

#### *Modalità di verifica delle capacità*

Case studies and financial reports will be discussed during the lectures.

#### *Modalità di verifica dei comportamenti*

Students will acquire an awareness of techniques to be used in an accounting and financial research department or firm. Accordingly, students will acquire confidence typical to the financial analysis.

#### *Indicazioni metodologiche*

The course has a practical focus.

The methods of fundamental analysis will be examined in detail and applied in cases and projects involving listed companies.

#### *Programma (contenuti dell’insegnamento)*
