EUROPEAN ECONOMIC LAW	IUS/05	LEZIONI	42	GABRIELLA IERMANO

Obiettivi di apprendimento

Conoscenze

The course will try to enable students to carry out a critical analysis on the topic addressed in class. To this end, students are exposed to the perspective of practitioners and of professors coming from various European universities. This will highlight real-life challenges and prove useful in the career-path. This will require to read through long and complex cases by the EU Commission in the relevant areas; develop familiarity with basic business law concepts; and the ability to argue and plead in public. Students are invited to think critically.

Indicazioni metodologiche

Students attending the classes are requested to actively participate to the discussion. They can prepare a presentation on a subject addressed during the lessons. The presentation will be part of the final examination (50% of the final grade).

Programma (contenuti dell'insegnamento)

Aim of the course is to provide students with an in-depth and critical knowledge of the European rules on company law, trade-mark law and competition Law and with an introduction to the Banking Union, to the Capital Markets Union and to the European rules on sustainable growth. If students complete the course successfully, they should be able to explain the main concepts that underpin European Economic law and to comprehend the policy issues that arise regarding the harmonization of company law and the regulation of the European companies, as well as European competition law and trade-mark law.

Students do not need a specific legal or economic background.

Considering the characteristics of the course, attendance is highly recommended.

Bibliografia e materiale didattico
